

Poly Stone™

The Look that Makes the Difference.

Courtesy of Viking Pools

The look that makes the difference.

Poly Stone™ surfacing can dramatically enhance almost any surface with spectacular granite colors and textures. With almost unlimited application potential, Poly Stone™ is often used in solid surface kitchen counter tops, bathroom vanities, shower surrounds, wall panels, fiberglass products, and furnishings.

Poly Stone™ is produced using both post consumer recycled content and renewable resource bio resins. This environmentally conscious approach is good for the planet and also can help meet LEED certification requirements. Poly Stone™ is free from hazardous ingredients and additives, and is both fire resistant and UV resistant.

Looking for something a little different? Poly Stone™ is available in hundreds of color combinations. Our library of colors might already match what you're looking for. Call with your color information or send us a sample and let our color experts create a custom color* to meet your needs.

Poly Stone™ particles may be used to cast solid surface, cast cultured granite, spray solid surface, spray cultured granite or in a variety of fiberglass applications. Poly Stone™ may also be used in specialty operations like Bulk Molding Compounds (BMC) or Sheet Molding Compounds (SMC). ACS makes hundreds of custom colors.

Our commitment to offering high quality, innovative products that use the latest technology in the industry, results in products of unsurpassed beauty and durability. Whatever your application, Poly Stone™ is certain to enhance its cosmetic appeal.

*Minimum 20 pounds for custom color orders.

ACS
INTERNATIONAL

The new **Poly Stone™** colors are formulated with the latest technology in the industry, utilizing our exclusive Platinum Flakes. The results are dramatic and enable Platinum Flake colors to show more depth, translucency and shading than previously possible in this type of product.
