

Artistone™

The Look that Makes the Difference.

Introducing a new line of Artistone™

Inspired by a symphony of natural granite tones, **Artistone™** offers an array of exceptional colors—without the cost associated with natural stone products. **Artistone™** is a cultured granite product designed for gel coated applications. The result is a luxurious, high-sheen finish that lasts.

Spending exorbitant amounts of money on natural granite is unnecessary when the beauty and selection can be achieved by using **Artistone™**. **Artistone™** uses a high quality marble filler base, enabling the look of natural granite and is an excellent choice for a variety of applications including; bathroom vanities, tubs, showers, and shower surrounds, wall panels, furniture and other simulated stone applications.

Twenty-nine shining colors are offered using a patented process for consistent, quality colors in addition to enhanced product performance. For more information, please contact ACS or your local distributor for more details.
